Assembly Technician – Mechanical Systems

Description

Newton Colmore Consulting are working with a leading manufacturer of medical technology and instrumentation, and we are searching for a mechanical system assembly technician.

As an assembly technician you will be supporting the full assembly cycle of the company's novel mechanical system, that fits within a desktop instrument. This will include the inspection, build, acceptance testing, service, and support of the system.

You will be working closely with mechanical engineers, electronics engineers, physicists, and chemists, as the system assembly process develops and improves.

In exchange for your skills and expertise, the company offer a highly competitive package tailored to your expectations and experience level, as well as providing an environment for you to thrive.

We are searching for a technician that is well skilled with mechanical systems assembly with an impressive eye for detail and accuracy. You will also need to have experience with the creation and execution of assembly protocols.

We are shortlisting for this role immediately so make sure to enter the process now in order not to miss out on this opportunity.

For more information, please call Matthew Lowdon of Newton Colmore Consulting on 0044 121 268 2240 or make an application and one of our team will be in touch.

Newton Colmore Consulting is a highly specialist recruitment consultancy operating within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors throughout Europe and the US.
