Complex Medical Devices Programme Manager

Description

A leading Medical Devices company, based in Cambridge, are currently looking for a senior Programme Manager to help deliver highly technical medical devices projects.

To be successful in this role, it is expected that you would have successfully delivered on a number of complex medical devices. When we say complex, we are talking about electro-mechanical, diagnostics, robotics and other complex fields within ISO 13485 or EN 60601 standards.

This company has a successful track record of inventing and delivering medical devices that have continually changed the market place. You will lead teams in the successful development of life changing and life improving medical devices.

Normally, to have moved into a senior Programme Manager or Project Manager role you would have worked within a technical role previously. Ideally, a background within physics, mechanical engineering, electronics engineer or other technical fields for medical devices development will be needed.

To have a technical background, we would expect that you would hold a technical degree along with specific medical devices industry experience. If you also hold a PhD this would be advantageous.

This is a great role for someone who has a real passion for developing medical devices. Apart from leading the teams in the development of medical devices, you would also gain access to career training and development to help improve your career.

Apart from leading the R&D teams, you will also help with the development of more junior team members and be the contact point for internal and external parties.

You will be rewarded with an excellent salary and benefits package that is not seen with many organisations.

If this is the type of challenging role you are looking for, you will need to apply now as I am expecting a lot of interest.

For more information please feel free to call Andrew Welsh, Director of Medical Devices recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.
