Contract Embedded Software Engineer – MedTech

Description

Newton Colmore Consulting is searching for an embedded software contractor for a medical devices company in Cambridge.

You will be working on a novel medical device, from initial concept all the way through to delivery of the project. The company is based in Cambridge and are offering hybrid work options for this contract position. Ideally, they are looking for an engineer to be on site for 2-to-3 days per week with the remainder working from home, but are flexible for the right candidate. This project is ready to go and so they are looking for someone as soon as possible.

If you have the following experience, we would like to hear from you;

- Experience in embedded software development in regulated environments (C/C++)
- Additional experience Python + LabVIEW desirable but not required
- A preference for engineers with formal ISO13485 and ISO62304 experience
- Experience with low-powered wearables is also a preference.

Rate is negotiable and will be tailored to your experience and expectations. It is expected that this work will last a minimum of 5 months, with a likely timeframe of 12 months.

For more details make an application now and a consultant at Newton Colmore will be in touch with more details.

Newton Colmore Consulting is a highly specialist recruitment consultancy operating within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors throughout Europe and the US.
