## Electronics Development Physicist – Medical Devices

### Description

A growing Medical Devices company are currently looking for a Physicist who can take on responsibility for the electronics side of their Medical Devices development. You will be working with other Physicists and engineers in the development of a new Medical Diagnostic device that is electromechanical in nature.

Based in Cambridge, easy to find from the city centre, you will use your past electronics and physics knowledge in the continued development of this Medical Device, working on elements such as electrical testing data-analysis using Python, wire bonding and other electronics/electrical physics skills.

If you have ever developed Microfluidic systems in the past this would be useful, either in Medical Devices or another field. It is expected that you would hold a PhD within a Physics, Electronics, BioPhysics or another relevant field.

After university you will need to have had a few years experience in industry or in a commercially focused Post-Doc.

This is a unique role with a growing company that offered you the chance to gain shares in the company too. Apart from this, you will be rewarded with an excellent salary and benefits package.

Due to the interesting nature of this work, I am expecting a lot of interest. If you are interested in this role, I suggest making an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on +44 121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Data Science, Machine Learning, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.

### Hiring organization

Newton Colmore Consulting Ltd

### Employment Type

Full-time

### Duration of employment

Permanent

### Industry

Medical Devices

### Job Location

Cambridge, Cambridgeshire

### Date posted

3rd January 2023

### Valid through

30.04.2023
