Embedded Software Engineer – Medical Devices Start-Up

Description

A new cutting-edge Medical Devices Start-Up company, based in South Cambridge, is currently looking for an Embedded Software Engineer to join them and take responsibility for development of all of their software on a new handheld medical device.

Based just South of Cambridge, you will be working alongside scientists, engineers, designers, physicists and other medical devices industry experts in the invention of this cutting-edge medical device.

Ideally, you will have worked within the Medical Devices sector previously and have good knowledge of ISO 13485, IEC 62304 and ISO 14971.

The company has the unique ability to offer an excellent benefits package, unusual for a start-up, including pension, shares, medical insurance, life assurance and some other excellent benefits alongside a competitive starting salary.

We are looking for someone to start as soon as possible and interviews will happen quickly, with this in mind, if you are interested in the role, I suggest making an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Data Science, Healthcare Communications, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
