Graduate Software Engineer

Description

A scientific company are currently looking for several Graduate Software Engineers to focus on the development of Medical Devices, Consumer Technology, Wireless Technologies, and Scientific Engineering technologies. Based in South Cambridge, you will be working alongside several software engineers, electronics engineers, mechanical engineers, and other experts on the development of these devices.

Ideally you will have a focus on using C, C++ or Python languages. It would also be advantageous if you have knowledge of Machine Learning, Computer Vision, Embedded Software or other complex software projects.

Your degree could be within computer sciences, physics, software engineering or another subject that has led you into software engineering.

This company offers an excellent starting salary, unmatched by most graduate opportunities. You will also be rewarded with an exceptional benefits package that include a generous pension amount, life assurance, holiday allowance, wellness programs, gym membership and other benefits you'd expect with large multinational companies.

The company also have an exceptional track record of developing people's careers with skills and career training. Due to this, your career could be exceptional.

We are expecting a lot of interest in this role and due to this the company cannot interview everyone. With this in mind they are hoping for people to hold a 1st or 2:1 degree along with strong A-Levels results.

If you have technical hobbies, I recommend mentioning it on your CV as they like people to have a passion for the sector rather than just looking at the role as a job. This could be programming, engineering and other hobbies that involve honing your problem-solving skills.

As I expect a lot of interest in this role, if you are interested, please make an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Data Science, Healthcare Communications, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
