Medical Devices Industrial Designer – Product Design

Description

A challenging role has become available for any Industrial Designer or Product Designers with Medical Devices experience. Working in Cambridgeshire, working with internal and external organisations to help with the invention and the improvement of life-saving Medical Devices.

You will be joining a team of engineers, physicists and product designers and hopefully you will bring with you the experience of successfully working on the Industrial Design and Product Design of a few Medical Devices.

As this company develops cutting edge technologies, you will always be working at the forefront of Medical Devices R&D. This is truly a great role for someone who wants to apply their industrial design and product design to the invention of new Medical Devices.

Due to the focus on Medical Devices product development, you will need to have a portfolio of successful Medical Devices in your history. As this is a creative role, we will also want to see your portfolio, that hopefully will display your knowledge of the Medical Devices sector and your graphics/user experience design skills (illustrator, Adobe XD etc.).

As the products you will be working on are Medical Devices, it would be ideal for you to have an industrial design or human factors design approach of Medical Devices. This would have normally started with a degree within Human Factors or Industrial Design; however we are open to people who moved into this type of role via another route as long as they have a successful track record in the Medical Devices sector.

This organisation will provide career development, continual skills training, excellent starting salary, bonus and other benefits that rival the majority of blue-chip companies, not to mention working on brand new technologies that will test you continually.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on +44 121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Data Science, Machine Learning, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
