Medical Devices Mechanical Engineer and Consultant

Description

A growing division within a large Medical Devices company are currently recruiting for an experienced Medical Devices Mechanical Engineer or Consultant to help with the invention of a range of lifesaving and life-improving Medical Devices.

There will be a number of projects that you will work on, across the different classifications of Medical Devices. You will range from being a part of a team of engineers and sometimes lead the projects yourself. This is a good role for your skills and career growth.

This is a great role for someone who wants to continually work on brand new technologies and working with a team of experts to invent these devices from scratch.

You will need to present ideas and updates to internal and external stakeholders. Due to this you will ideally have past experienced presenting or have the ability to communicate clearly.

Due to the technical nature of this role, it would be ideal if you have a passion for problem solving. This could have been during work or during any technical hobbies you may have, that you can ideally note of your CV.

It is expected that you would have an excellent education background with degree within Mechanical Engineering or another subject that has led you into a Mechanical Engineering role in the Medical Devices sector.

Apart from the career progression, skills development and working on the invention of brand-new technologies you will also be rewarded with an excellent starting salary (depending on level of experience), bonuses, shares and other excellent benefits.

I'm expecting a lot of interest in the role, so if you are interested, I suggest you make an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on +44 121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.
