Production Manager – Medical Devices

Description

Newton Colmore is working with a technology company in Cambridge who are looking for a production manager.

As a production manager you will be trusted to develop and expand the company's production capabilities.

You will be using automated, precision assembly equipment, and production processes to achieve this. These will include laser machining and laser welding to enhance processes, which generally run on bespoke, PLC-controlled manufacturing stations.

You will also get to plan and implement a new production strategy, develop the production facility and processes, and grow the team with the next generation of engineers and operatives.

The company's novel technology can be deployed in both the medical devices and life sciences sectors and so we are ideally looking for a production specialist with a passion for live improving technology.

To be considered for this exciting role you will need to have experience with ERP systems and quality management systems. This will be coupled with a solid understanding of managing precision, and automated production within ISO9001 or similar environments.

In exchange for your skills and expertise, the company offer a highly competitive package as well as providing excellent career progression.

This is an opportunity not to be missed. For more information, please call Matthew Lowdon of Newton Colmore Consulting on 0121 268 2240 or make an application and one of our team will be in touch.

Newton Colmore Consulting is a highly specialist recruitment consultancy operating within the medical devices, Scientific Engineering, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors throughout Europe and the US.
