## Project Leader – Class 3 Medical Devices Embedded Software

### Description

Due to expansion, a Medical Devices organisation, based in Cambridgeshire, are currently looking for a Project Leader to assist with the development of Class 3 Medical Devices. Specifically using your past Embedded Software skills while also leading a small team of Embedded Software Engineers.

This is not a management role, more of a leadership role where you will be hands on with the development yourself while also mentoring more junior members of staff. This experience could have come from being a senior Embedded Engineer who took on extra responsibility in the past or maybe working as a Project Manager or Consultant on Embedded Software projects.

Although it would be advantageous for you to have worked on Medical Devices previously, we will also be interested in hearing from you if you have been in another highly regulated field such as Aerospace, Sciences, Automotive etc.

This company have a strong track record of developing careers, due to this you'll be given extra development and training as they will want you to grow with the business.

It is expected that apart from career experience, you will also hold a degree within a software, electronics or other subject that led you into a Embedded Software Engineering career.

Running software teams using agile or waterfall methodology would be highly advantageous, so if you have this experience, please make it clear on your CV.

Apart from the career development, you'll also be rewarded with an excellent starting salary, bonuses, pension, free meals, and other excellent benefits.

I expect a lot of interest in this role due to the career development on offer, rare in the current marketplace, so if you are interested, I suggest making an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Data Science, Healthcare Communications.
