Senior Electronics Design Engineer – Medical Devices

Description

A growing R&D Division is currently looking for an experienced Electronics Engineer to join the group and lead the development of new Medical Devices as a Senior Electronics Design Engineer.

You'll be based just South of Cambridge, in state-of-the-art R&D labs and workshops working on the latest Medical Devices technologies that will push the forefront of the sector.

It will be essential for the successful person in this role to have experience in multi-layered architecture of Medical Devices. Ideally across a number of successful Medical Devices that have done to market.

You'll be working as part of a multi-discipline team with mechanical design, electronics, physicists, scientist and other experts needed for the development of Medical Devices.

We are open to people from other sectors than Medical Devices, however you will need to be coming from a highly regulated sector such as automotive, aerospace, scientific fields. It would obviously be highly advantageous if you have come from the Medical Devices sector, working to ISO 13485, EN 60601 and IEC 62304 standards.

It is expected that you would hold a degree within and electronics field or another subject that led you into becoming an Electronics Engineer or Electronics Design Engineer. However, industry experience would be more important than a degree.

If successful, you would be rewarded with an excellent starting salary, benefits, bonus and career training and development.

I'm expecting a lot of interest in this role, so if you are interested, I would suggest making an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Data Science, Healthcare Communications. Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
