Senior Electronics Engineer – Medical Devices

Description

Due to the growth of a leading Medical Devices company, based in South Cambridgeshire, we are currently looking for couple of Senior Electronics Engineers to help develop new Medical Devices to ISO 13485 standards.

You will be working as a team with other Electronics Engineers, Software Engineers, Embedded Engineers, Mechanical Engineers, Scientists and Physicists.

You will need to have a track record of developing new Medical Devices that have successfully gone to market, where you have specifically been involved with the electronics design for products to ISO 13485 standards.

It would be advantageous if you also have knowledge of EN 60601 standards, but not essential.

Due to this role being at a Senior Electronics Engineer role, you will need to be able to relay information and updates to internal and external teams as this role will involve some Project Management duties also.

As mentioned, it is essential that you have developed Medical Devices, Healthcare Technology, Life Sciences or Diagnostics equipment that are to ISO 13485 standards.

It is expected that you would hold a degree from a leading university along with your industry experience, however a successful track record of developing Medical Devices will be more important.

We are looking for people to start as quickly as possible so if you are interested in joining a growing team and helping develop new Medical Devices, I suggest applying now or risk missing out.

This company will offer an excellent starting salary, pension, bonus, shares purchase scheme, private healthcare and other excellent benefits. They also continuously develop your skills so you are at the forefront of the Medical Devices sector, something not often provided by companies.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on 0121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Scientific Software, Robotics, Data Science, Healthcare Communications. Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
