Senior Electronics Engineer – Medical Devices Invention

Description

A growing Medical Devices company are currently looking for an experienced Electronics Engineer to help with the invention and development of brand-new Medical Devices. Based just north of Letchworth Garden City, you will be involved with developing cutting edge technologies.

Working alongside physicists, mechanical engineers, scientists and other Medical Devices experts, you will be developing lifesaving and life-improving Medical Devices.

You will have a background of designing and developing Medical Devices to ISO 13485, IEC 62304 and EN 60601 standards.

It would be useful if you have worked on a number of different types of Medical Devices during your career such as Medical Robotics, Wearable Diagnostics, Injectable Treatment and other complex Medical Devices with electronics design at the heart of the tech.

To be successful in the role, it is expected that you would hold a degree within a electronics, physics or other subject that let you into working on electronics design of medical devices.

Apart from working on the latest areas of Medical Devices and Healthcare Technology, you will also be rewarded with an excellent starting salary, bonus, pension, healthcare, shares purchase schemes and other excellent benefits you do not normally have access to with most companies.

This is an exciting role where you can focus on new types of Medical Devices, so I expect a lot of interest. If you are interested, I suggest you make an application now or risk missing out.

For more information, please feel free to call Andrew Welsh, Director of Medical Devices recruitment and Scientific recruitment specialists Newton Colmore Consulting, on +44 121 268 2240 or make an application and one of our team at Newton Colmore Consulting will contact you.

Newton Colmore Consulting is a specialist recruitment company within the Medical Devices, Scientific Engineering, Data Science, Machine Learning, Scientific Software, Robotics, Science, Electronics Design, New Product Design, Human Factors, Regulatory Affairs, Quality Assurance and Field Service Engineering sectors.
