Senior Microbiologist – Bioprocessing

Description

Newton Colmore Consulting is working with a biotechnology innovator in Cambridge and is searching for an experienced microbiologist to join their team.

As a microbiologist you will be charged with leading scientific research and creating novel solutions to several industrial bioprocessing challenges. This can range from working on biology-based sensors that use living organisms, through to utilising synthetic biology for fully automated high protein animal feed production.

You will be using your experience to work on technologies from initial ideation, through to delivery and manufacture. You will take charge of the full development process and will be working closely with a multidisciplinary team, all aiming to make a step change with new ideas.

This company are well established within their field with highly impressive lab capabilities, and you will always have something new and interesting to work on. They foster a culture of innovation and autonomy, and this role can be easily modified to suit your experience level.

In exchange for your skills and expertise, the company offer a package tailored to you, which includes performances bonuses, free lunches, and market leading pension contributions. You will also be able to follow a defined career path, offering you great training and development opportunities.

To be considered for this exciting role you will need to have an understanding of research and development projects within bioprocessing. This will need to be coupled with strong academics and ideally with experience with 'omics and microscopy as well as knowledge of biochemistry.

For more information, make an application now and a consultant in our team will be in touch with more details.

Newton Colmore Consulting is a specialist talent acquisition consultancy operating within the medical devices and biotechnology sectors. We have over ten years' worth of expertise of placing candidates with our clients, globally. Our sole aim is to utilise this expertise and knowledge to maximise your chances of securing your ideal role with our clients.
